

JORGE ENRIQUE DIAZ BENITEZ

STUDENT IN INFORMATION
TECHNOLOGY AND DIGITAL
INNOVATION ENGINEERING

EDUCATION

Information Technology and Digital Innovation Engineering

Tijuana University of Technology (UTT)

- Currently in the 5th semester.
- Intermediate degree: Associate of Science in Digital Network Infrastructure.

TECHNICAL SKILLS

- Virtualization and Servers: Implementation of Type 1 (Proxmox VE) and Type 2 (VMware, VirtualBox) hypervisors.
- VDI (Virtual Desktop Infrastructure) solutions and independent session management.
- Linux server administration (Debian, Arch-based): user, permission, and service management.
- Networking (Cisco): Configuration of routers and switches using the Cisco CLI.
- Protocols and services: OSPF, VLAN, ACLs, and DHCP.
- Development: Languages: Python (OOP) and Java.
- Databases: Knowledge of PostgreSQL (relational).

WORK EXPERIENCE

GROCERY STORE (LOCAL BUSINESS) | ASSISTANT MANAGER / GENERAL ASSISTANT

- May 2020 – Present (6 years of experience)
- Coordination of daily operations, staff supervision, and customer service management.
- Inventory control, cash handling, and cash register management.
- Resolution of minor technical issues and optimization of sales and supply processes.

LANGUAGES AND SKILLS

- Spanish: Native.
- English: B1 level.
- Soft Skills: Conflict resolution, critical thinking, collaborative project work, and self-directed learning

ABOUT ME

I am an Information Technology Engineering student with a focus on implementing scalable technological solutions and managing critical infrastructure. I have a practical background in Linux systems, networking, and desktop virtualization. I bring six years of professional experience that demonstrates my ability to take on responsibility and solve problems under pressure in demanding environments.

PROYECTOS DESTACADOS

- **UNIPROX (Laboratorio de Cómputo Centralizado)**
- Diseño de una solución de bajo costo utilizando Proxmox VE como sistema base para la distribución de recursos (CPU y RAM) en sesiones independientes.
- Implementación de gestores de escritorio (Connection Broker) mediante VMware Horizon y Microsoft Remote Desktop Services (RDS).
- Configuración y despliegue de terminales Wyse 3040 para la gestión centralizada de perfiles, Wi-Fi y conectividad remota.
- **Fénix Hospital / Nexus ERP**
- Desarrollo de un sistema integral para gestión de citas médicas e inventarios (método FEFO) bajo el estándar IEEE 830.
- Uso de Python (FastAPI) para el backend y PostgreSQL para la persistencia de datos.
- Integración de acceso remoto mediante la solución VDI NoMachine.
