PROFILE

Infrastructure and networking student with hands-on experience in virtualization, Linux administration, network configuration, and infrastructure monitoring. Interested in infrastructure security, SOC operations, and systems administration.

TECHNICAL SKILLS

Networking

VLANs, OSPF, ACLs, NAT/PAT, STP, Cisco IOS, pfSense

Virtualization & Storage

Proxmox VE, VMware, TrueNAS, ZFS, snapshots, replication

Systems & Monitoring

Linux, Docker, Docker Compose, Git, Wazuh, Suricata, Netdata, Wireshark

Programming

Python, Java (OOP Fundamentals), Bash Scripting

EDUCATION

Universidad Tecnológica de Tijuana (UTT)

Ingeniería en Tecnologías de la Información e Innovación Digital

Técnico Superior Universitario en Infraestructura de Redes Digitales

Currently in 5th Term

Expected Graduation: 2028

CERTIFICATIONS

- Cisco Networking Basics (*Completed*)
- CCNA Enterprise Networking, Security, and Automation (*In Progress*)
- ITEP English Certification (*In Progress*)

LANGUAGES

Spanish: Native

English: Intermediate (B1)

TECHNICAL PROJECTS

Modify x OpenEMR Infrastructure Project

- Participated in the design and deployment planning of a virtualized healthcare infrastructure project with a projected budget of \$766K MXN.
- Configured segmented network environments using VLANs, routing, ACLs, and pfSense firewall policies.
- Implemented virtualization and centralized storage solutions using Proxmox VE and TrueNAS.
- Produced infrastructure documentation including topology diagrams and IP addressing plans.

Personal Infrastructure & Virtualization Lab

- Managed virtualized environments using Proxmox VE with LXC containers and virtual machines.
- Deployed Linux-based services including DHCP, reverse proxy, monitoring, and firewall solutions.
- Worked with Docker and Docker Compose for containerized service deployment and testing.
- Performed network segmentation, traffic analysis, and infrastructure monitoring in isolated lab environments.

PROFESSIONAL EXPERIENCE

Medtronic

Manufacturing Operator

- Worked in FDA/ISO-regulated medical manufacturing environments following standardized operational procedures.
- Maintained production documentation and quality-control records with attention to detail and operational accuracy.

Foxconn

Logistics Operator

- Supported inventory tracking, material verification, and logistics coordination in high-volume operations.
